Agenda Item Number: Item 5-Parking Policy Reform for Non-residential uses in Transit Parking Areas & Neighborhood Commercial uses Citywide

Comments: Our University Heights CDC-Community Parking District requests that in implementing the proposed Parking Policy Reforms that the City will partner with all parking districts to ensure that changes will not negatively impact their projects. It should be understood that our parking districts are mostly contained within the Transit Priority Areas and neighborhood commercial districts, and it is essential that input should be garnered from the existing districts.

Agenda Item Number: Item-6 Community Parking Districts FY 2022 Annual Plans & Budgets

Comments: Our University Heights CDC-Community Parking District (CPD) requests your support for our FY 2022 Annual Plans & Budgets; this also includes your support for all other parking districts. We feel the urgency of continued parking management and eyes on the street within the CPD boundaries because of the current changes under Parking Policy Reform for Non-residential uses in the Transit Priority Areas and Neighborhood Commercial uses. We also would like to emphasize the need for greater expeditious assistance from the City in implementing the projects as outlined in our current FY 2022 Budgets and Activities.

Agenda Item Number: Item number 6 Pacific Beach CPD Fy 2022 annual plan and budget. pdf

Comments:

Several proposals for a parking meter zone in Pacific Beach have been made throughout the years. These proposals have never been accepted by the residence or the business community and therefore were not implemented. The most recent community survey found that only 37% of respondents supported a parking meter zone in PB. That survey was determined to be a valid sample of the PB community. The Pacific Beach Parking Advisory Committee has chosen not to conduct a new survey fearing the results. City Council policy 100-18 confirms that metered parking and related traffic management and control will impact adjacent streets. The residence living just a half block and more from the parking zone are concerned about the impacts on their neighborhood. Their streets are already congested by daily parking of beach visitors. Neighborhood residence fear that drivers attempting to avoid meters on the business streets will also be looking for free spaces by their homes. This will result in less residential parking, increased pollution, more noise and litter as well as additional strangers in this high crime area. The Parking Advisory Committee has expressed no concern about these issues.

Comments:

Overwhelming majority of Pacific Beach community is vehemently opposed to paid parking. PB Parking advisory board knows that they do not have the support of the community. The same small group of interested parties have been trying to push paid parking for 20 years. In the past when meetings about proposed paid parking were opened to the public there was an avalanche of opposition. Now the PB Parking Advisory Board came up with a new strategy - sneak this through during a pandemic when nobody is paying attention and lie to the city council by saying that they have the support of the community.

In November 2020 the advisory board held a "public" meeting to finalize their parking plan. Here's how they informed the community - They put a little 2 line classified ad in the Beach and Bay Press. I was the only community member not on board attending meeting. I was muted and kicked out of the meeting for expressing opposition.

Board's tactics are deceptive, dirty and despicable.

Paid parking would have a huge negative impact on thousands of people's lives.

Please support the community and vote no to paid parking in PB.

Comments: How long will we forego in-person meetings if the city is already opening up?
